

Thanks for Downloading Our Flash Icecast Player V1.0

This Flash File Created with Flash8 – Published under Flash8.
Size: 590x300 or Resizable – 25KB

Note: Please Install necessary Font/s before opening FLA source.

Free Font: Bavaria Regular

Download link: <http://pixelfonts.style-force.net/>

About This Flash:

This is a Fully Dynamic Compact Icecast Player with special design and functionality.
The player feeds itself with a XML file and grabs the Song Title from Icecast radio server Live and shows it on Radio Panel with Ticker effect.

Server Requirements:

Icecast Player needs a PHP server.

What's new in this Player?

- A Compact design for easy implementation on your websites
- Player colours are fully dynamic and can be set in XML without need of opening FLA.

How we use This Player?

To prepare Your Own Player, you should do following process:

In radio.xml:

```
<Radios>
<radio radio="radiator.nci.de" port_mount="8000/high_q"/>
<radio LCDTextColour="308bb6" LCDBackgroundColour="444444" PanelColor="222222"
ElementColor="666666"/>
</Radios>
```

Important: Don't enter "**Http:///**" or port separator sign "**:"**" into xml, flash does this automatic.

Thanks for Downloading this File, Good Luck using the file in your projects!
